Microsoft Dynamics AX

Furniture Based Version by Syscom PLC

Designed for Furniture & Soft Furnishing Industries

Working in these unique industries can be daunting. Unlike other manufacturing establishments, manufacturing furniture is a highly complex process as the items you are making have already been sold.

Not only are furniture items fashionable and in high demand, but customers are given promise dates that must be adhered to. The list of options available can sometimes be immeasurable and the fabric often needs to be ordered well ahead of the sales order even being received. It is vital that the details of sales orders are accurate or it could be costly to rectify later.

It is for this reason why Syscom, in conjunction with Microsoft and the Furniture Industry, have collaborated on an industry specific version of their Microsoft Dynamics AX ERP Software. This version is designed by your industry, for your industry -

answering questions and offering solutions to common industry problems, for instance:

Dye batch matching; does the fabric carry a fire certificate?; stretch qualities; is there sufficient meterage to complete a job?; delivery schedule alignment with courier; In what order should I schedule production?; can I bulk pick to save time?; when should I order the frames and springs?; how do I capture the status of each order to relay to my customers?; are the details of this order correct?; are there any accessories required?; should the cushions have the same fabric front and back and are they the right size?

The software encapsulates all of the features contained within existing furniture systems, adding to them the extensive functionality and stability within Microsoft Dynamics AX.

Microsoft Dynamics AX for Furniture Manufacturers from Syscom has been developed exclusively for the Furniture and Soft Furnishing industries by the industry itself. It is the product of countless hours of collaboration with major players from these industries to tackle the challenges faced daily.

By adapting Microsoft's 'Best of Breed' ERP application – Microsoft Dynamics AX - Syscom has built upon the already outstanding features of Microsoft Dynamics AX to produce a product that simplifies everyday challenges.

Microsoft Dynamics AX for Furniture Manufacturing will allow you to effortlessly plan your preferred business processes. From how you schedule stock and production activity to how and when finished items are delivered to customers is wholly up to you.

Why not let customers or resellers place orders to you through inbuilt

Microsoft Dynamics AX 'Web Services' to save sales order entry time and costly mistakes. Use the inbuilt Product Configurator to simplify those complex requirements and automate BOM and routing instructions. Visualise your enterprise operation and access information from anywhere, even sitting on a train.

Microsoft Dynamics AX for 'Furniture Manufacturers' has taken the standard ERP system to a whole new exciting level and through a single application, allows you to manage; Sales Order Processing; Manufacturing Planning; Production Scheduling; Dispatch Planning; Integrated Financials; Inventory Management; Product Configurator; EDI; Pricing Methods; Weaves into the fabric of your operation; Barcode Labelling; Quarantine; Tracked Fire Certification; Travel Documentation; Shop Floor Data Capture; Piece Work; Fabric and Raw Material.
